

NISHANT PARWANI

Machine Learning Engineer | Full-Stack Developer

contact@nishantparwani.com | +91-7862045943 | nishantparwani.com | github.com/nishantparwani | linkedin.com/in/nishant-parwani

SUMMARY

Machine Learning and Software Engineering generalist with hands-on experience building end-to-end IoT health-monitoring systems, regression-based predictive models, and blockchain-secured data pipelines. Founder of a B2B technology services startup. MBA Tech at NMIMS Mumbai; CGPA 8.43. Smart India Hackathon finalist in Health and Technology. Published independent techno-economic research on SSRN.

EDUCATION

BTech Computer Engineering + MBA (Dual Degree)

2024 – 2029

NMIMS (Narsee Monjee Institute of Management Studies), Mumbai | CGPA: 8.43 / 10

Class Representative | Students' Council Contingent Leader

LEADERSHIP and EXPERIENCE

Outreach Core Member | Taqneeq TechFest (TQ 18.0), NMIMS

Oct 2024 – March 2026

- Led participant acquisition for one of Mumbai's largest annual tech festivals; previously managed Logistics Executive.

Public Relations Core | 4C – The Marketing Cell, NMIMS

Dec 2024 – March 2026

- Drove PR strategy and stakeholder communications that generated 2,000+ event registrations; promoted from Volunteer Executive to Core within six months.

Technical Volunteer | Sant Hirdaram Sewa Trust

May – Jun 2025

- Deployed digital outreach solutions and managed beneficiary registration data systems for 100+ individuals, improving record.

SELECTED PROJECTS

Machine Learning and Data Science

- Predictive Modeling Pipelines: Engineered an ensemble-based **Land Price Predictor** (Random Forest, XGBoost) and a live Stock/Finance Predictor utilizing financial data APIs; implemented feature selection and cross-validation to optimize accuracy.
- Quantitative Policy Analysis: Executed a survey-driven **transport survey for Mumbai's suburban rail network**; utilized pandas, NumPy, and statistical hypothesis testing (t-test, p-value) to derive insights.

IoT, Embedded Systems, and Blockchain

- **Real-Time Health Monitoring**: Developed a **cardiac abnormality** detection system on ESP32 with live health alerts, integrating sensor data acquisition, signal processing, and IoT-based notification pipelines.
- Cryptographic Data Integrity: Implemented a **secure voting system** using **SHA-256 hashing** and Firebase to ensure tamper-proof data verification; demonstrated principles blockchain and cryptography.
- 3D Spatial Modeling & Interaction: Engineered a gesture-controlled ADPS 9960 sensor robotics system and a "Jumanji-style" immersive game engine; trained a Machine Learning model using LiDAR sensors and the CAPE dataset for spatial point-cloud mapping.

Full-Stack and Software Engineering

- **RESCUE-Mumbai**: Developed a full-stack Rapid Emergency System Coordination and Unified Engine using HTML, CSS, and MySQL(Grok) to streamline crisis response logistics.
- Frontend Engineering: Designed and deployed a personal portfolio (nishantparwani.com)

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, HTML, CSS, MySQL, NodeJS, R (basics)

ML Frameworks: TensorFlow, OLS Regressions, pandas(basics), NumPy

Platforms: Firebase, ESP32, Arduino, Bloomberg Terminal, MS Office , AutoCAD

Domains: Machine Learning, IoT and Embedded Systems, Blockchain, Full-Stack Development

ACHIEVEMENTS AND RECOGNITION

- Smart India Hackathon(MoE): Ranked 2nd nationally in Health and Technology category (Round 2); delivered working prototype addressing real healthcare.
- Published independent economics research preprint on SSRN (DOI: dx.doi.org/10.2139/ssrn.6289139).
- Secured 2nd place among 80 participants at University research poster symposium; presented complex technical findings to multidisciplinary panel.
- Model United Nations: Verbal Commendation and two Special Mentions for analytical reasoning and public speaking.
